

Cambiocorsa

Cambiocorsa is the complete unwinding multi-lane unit (6 lane width) placed in front of the machine in the operator area. It has a supporting structure treated with chemical zinc-coating and epoxy paint for anti-corrosion guarantee. Antivibration standing feet, aluminum frontal plates. Expandable Tidland rolls supports, driven by AC motors with belts and pulleys. Automatic transmission with zero-speed concept. Splice made with adhesive tape. Horizontal moving roll with pneumatic cylinder and proportional valve for pressure management. Linear potentiometer for determining the position of the mobile carriage for the unwinding. Automatic material center system, before the slitting with a sensor on a side.

Cambiocorsa

Machine working direction	left hand or right hand
Primary voltage	400 V (+ / - 5%), 60 Hz, 3 PH
Total change-over efficiency	$\geq 99\%$ *
Waste for splice	≤ 3 clips
Design speed	420 lfm
Production speed	up to 336 lfm
Maximum roll width	46.7 inch
Maximum roll diameter	46.7 inch (59 inch at request)

**except for cleaning, maintenance and change-over*
