

Convertible

Convertible is an innovative line derived from the Maxxi series with the integration of a log saw for the production of hygiene wipes, cleaning wipes, cosmetic and pharmaceutical wipes. It has a cutting system with a speed from 240 up to 600 cuts/minute, with a quality and a reliability always on the top of the market needs. It's an integrated line that allows the maximum control of the process and the maximum efficiency for a fast and easy installation and start-up.
