

## Dos-Cap 6000

---

Dos-Cap 6000 is the mono-block machine by Teknoweb, characterized by alternate movement, for liquid filling in phials with a powder tank. A special dosing machine releases the desired quantity of products with final fastener through a shear capsule. The significant use of electronics enables the achievement of coupling tolerances for the three elements phial-tank-capsule which assure a very long integrity of the powder.

### Dos-Cap-6000

---

Product infeed	automatic with vibrators
Installed power	7 Kw
Functioning	electronic pneumatic
Control	electronic
Mechanical speed	7200 phials / hour *
Production speed	up to 6000 phials / hour
Infeed height	about 35.4 inch
Operating pressure	6 bar
Air consumption	220 nl / min
Total machine weight	1500 Kg

*\*depending on the features of the product, the dose and the size of the phials*
