

from dry to wet. easily.

## Briefly

---

Teknoweb starts its history in 2004 in Palazzo Pignano, near Cremona, in Italy. The company was established on the specific market of wet wipes machines, beginning with the basics and trying to bring in the market the concept of trouble-free production lines for wet wipes; this was possible trying not to base the project on existing technology, but transferring the know-how derived from 30 years of experience in the production of machines for hygiene products by Piero Mandotti and Fabio Zampollo, the two founders. The desire not to work on changes but on innovative solutions for even better efficiency and reliability of converting lines for wet wipes has been the real driver of the know-how transfer.

To this day, Teknoweb has installed more than 120 machines worldwide.
