

from dry to wet. easily.

Goals

The goal of Teknoweb is to improve the quality of the information and of the technical, scientific and productive knowledge around the care instruments of human and living beings, of things and environments. The goal of Teknoweb is to manufacture products even more suitable to the market's and customers' needs, trying to follow and advance, when it's possible, the development of converting technology.

The engagement of Teknoweb is to work daily for this goal, respecting safety and health policies for the people and for the environment.

Moreover, Teknoweb has the goal to reach the technological leadership on the European market both for wet wipes and laundry fields. The expectation is to reach by 2012 the same European volume of sales even in the North and South American markets.

The continuous research and development operated by Teknoweb pushes forward towards technological innovation and high performance, such as: increased production speed, maximum automation, system flexibility, product diversification, staffing reduction.
